

THE FOUNDATION OF TECHNOLOGICAL DEVELOPMENT AND CHILDREN INTELLIGENCE

Yayasan Pengembang Teknologi dan Inteleksi Anak (YPTIA)

∞ create the wider future ∞

Children are the future of the world,
We will leave our unfinished task
to our children,,,
Because they have a lot of dreams and hopes

By our help through affection,
education and safety environment,
Hopefully it will help them
to reach their dreams and hopes
Which it will bring us to become
the better world in their hands

Do not revile them, nor the offended,
do not let them despair...
because they like another clean sheet of
paper...
let's fill them with love,
lived with a sense of caring, build knowledge,
build motivation among millions of their
dreams...
Also useful for them
for the next generation

Yayasan Pengembang Teknologi dan Intelegensi Anak

We exist and are present in the community looking forward to share the love with the children and families in Indonesia to support the children growth process includes psychological needs, nutrition, integrated education from early childhood through higher education. We are present in the community and to serve the people who have the expectation and objective of meeting the basic rights of children in Indonesia.

Our main programs are now much more on the optimization of development of the child with special needs, technical support, strengthening the ability of children, to campaign about children's issues in Indonesia to resolve the problem of millions.

We were incorporated in the coordinating institution known as **“The Technological Development and Children Intelligence Foundation” / “Yayasan Pengembang Teknologi dan Intelegensi Anak” (YPTIA)**. The foundation was established as a charitable organization that aims to support development in Indonesia particularly to prepare and enrich the next generation’s abilities since birth, while growing and up to preparing the sovereignty and ability of children in the future within global competition, especially the children with special needs.

Since 2015 the foundation has grown by developing social-oriented institutions and continue to consistently focus on its role as a foundation that really cares about education, especially of children from an early age and children with special needs in the national development in Indonesia. As a social business institution in Indonesia, YPTIA cooperating partners and contributors in providing inclusive education from an early age that prepare the tough next generation with global perspective and deep roots in the culture. Nowadays, children who become our target students are majority the Indonesian nation. This collaboration is in line with our aspiration to deliver intellectual future generation by having the character of the noble nation with global insights that are ready to lead the transformation in building the nation and impacted the global community.

Through one of YPTIA programs, through educational institutions Maxkidz, Forming the students from an early age to be prepared to be tough individuals who have professional expertise, global insight, spirit of leadership, responsive and dynamic, independent and collaborative that able to compete in the global society. Maxkidz Academy provide students with educational surrogate character and distinctive competencies that are important in the future, such as skills in solving problems and able to think critically, communicative, collaborative and ability to master the technology and media.

YPTIA in his work has developed educational programs through institutions Maxkidz. Many positive impacts are felt by people and families, especially families with children with special needs. Maxkidz optimizing the ability of the special children in accordance with the dominant intelligence (Multiple Intellegences) to strengthen the ability of social skill. By optimizing the intelligence of children from an early age, which is expected to be the provision of children's sovereignty in the future to be one of the valuable investment for children's future in the global competition. For that YPTIA trying to build the direction of social transformation that will inspire all parties to join hands in order to move ahead with bringing the nation better generation.

Transformation of YPTIA

Since 2008, Mr. Rudi Wibowo was an activist who cares about the world of children, then established YPTIA with many people's perceived his role has been experienced by society through conducting research on integrated education ideal pattern to support child optimal growth earlier. Basic research that later became the embryo grows and develops at the focus of the four main pillars: technological development of early childhood education, building a family awareness, instill the entrepreneurial spirit from an early age, health, and psychological insights in the development of the child.

Over time, Mr. Rudi Wibowo constantly supported by his friends to campaign the movement of optimizing the important role of family in child development and character formation earlier in order to create next-generation with high competitiveness in the midst of a global society that the issue was still largely ignored by many families by the

time. The whole team, together really tirelessly support each other happily and present in the midst of society. The team has been educating families and train children from an early age with specific skills-based Multiple Intelligences which are important for the future. Other than that, they held various training events, which entirely free for the teachers of early children education and elementary to optimize self-ability in managing and teaching the students by environmental use and technology that still claimed very exclusive by people through seminars, workshop, and other assisting program.

In 2015 YPTIA a license for establishing a foundation was officially issued by decree KEMENHUMHAM REPUBLIK INDONESIA AHU-0017293.AH.01.04.Tahun 2015 and made YPTIA increasingly focused on the vision, mission and reach a wider support in reaching steps in the movement on instill public and family awareness.

With integrated family education, a number of changes have helped to reach more children around, in order to optimize the expertise in particular fields earlier and maximizing intelligence dominance. And when children are expected to present later in the global community, they will be able to become professionals or entrepreneurs according to their potential superiority. And now, we have created a superior alumni community in building a successful global environment.

Vision and mission

YPTIA continues to work to defend the rights of children especially those with special needs, and to help them fulfill their potential, from early childhood to adolescence. And we continue to fight never give up. Let's help us fight for them.

Our Vision

Make children as a part of the better world's future designer.

Our Mission

- Establishing an integrated educational institutions which accommodate and maximize the multiple intelligence of children from an early age, especially for children with special needs.
- Established a research and development center that accommodates intelligence technology and child development so that it can help people get to share data and information that accommodate a variety of important purposes and benefits to children from an early age.
- Actively organize various educational programs such as workshops, competitions, exhibitions, seminars, talk shows and such as the effort to build awareness among parents in educating the nation's children to be more competitive - responsive in dealing with global challenges in the future.
- Continue to maximize the development of the quality and quantity of resources, systems, technologies, value of products, expansion of the network, a professional attitude, concern, honesty, and continue to invite the society to open up and develop insight into child care.

Caring Program

Children with a good environment, good nutritional needs, the right support and affection from family will be able to help the growth and development of children's intelligence to be more optimal. With good intelligence, the children will be able to create chances of their own better future.

YPTIA cooperates with various parties and moves together to fight for community-based special care or mentoring programs. Where the children can connect directly with our volunteer team and can also to get a good education without being disturbed by their special physical or mental condition.

We would like to invite volunteers who care about children, especially with children who have special needs, to help them recognize their needs that exist, so that they will have better lives in the future. If you have a big heart and want to help them, you can support our program through donations or can join directly as volunteers which can connect directly with children who really need special attention.

Children Caring Program

What does YPTIA do for children in Indonesia? Join us to make a direct impact on the lives of children for the future of the world and the life in them for the better. Let's support YPTIA nation children caring program:

- Establish an integrated cost / free inclusive schools for children who are economically unable.
- Establish a center for integrated health care, nutrition, psychological and mental assistance for a mother to be, families, mothers and children.
- Establish free education and training center for teachers, parents community, a group of volunteers who are willing to dedicate themselves to children with special needs at an early age.
- Establish a research and development laboratory of the child growth that can be a source of accurate and relevant databases and sources for public information.
- Establish entrepreneurship incubation center set up for children at an early age.

Let's speak up and invite together: The main role of parents for children from an early age. The importance role of community in supporting the world of children. The importance role of government in policies so that it's more usefull for children!

Resources

We continue to proact and campaign for the importance of the future of the world by reaching more and more children as the next generation of world civilization in order to have the ability and opportunities to better manage the future of the earth, including the ability of children with special needs.

We continue in conducting the research, developing, and dissemination of material about children in Indonesia. And our work is based on empirical data, careful research, and detail analysis. We believe that the information we have collected, can lead us to change in a broader future for children.

Resources for Teacher

Access lesson plans and other materials for teachers. And our lesson plans have helped the teachers to develop their teaching process and guide them to get sustainable goals in the classroom for children with special needs.

Resources for Parents

Help your child to reach their full potentials. Our program can be accessed by parents through seminars, family camps, family accompaniment, education for parents, social media and others. And it is hoped that this program will continue to help children develop to reach their full potential.

Stories

Tian a 7 year old boy and experiencing psychomotor disorders (Cerebral Palsy) with hands and feet is not functioning optimally. When we first met, he has not been able to walk only crawl and his communication still needs a lot of stimulus, but cognitively Tian has no problem. Seeing that we are very motivated to help Tian to achieve what he and his parents expected.

As a child with physical and incredibly cognitive limitations, Tian hope to be like other children, play, run, jump, have many friends and dreaming to be a super hero who can help many people.

Children who experience such conditions as Tian, with limited costs and insight into his family made him very dependent with limited-paced environment.

"I want my children could enjoy a successful future as other normal children." Said the Tian's parents.

YPTIA cooperating with various parties including those who open their heart and are moved to seek a caring children program with special needs based in the society. Where children like Tian can be reached individually by our volunteer team that also get a good education without being disturbed by the state of his special physical or mental condition.

We are proud of our children, they are great and look like normal children who are full of dreams and hopes for their future ...

*We are happy when our children **aspire to be an engineer** who wants to make **the best train** in the world ...*

*We were touched when **they diligently** wrote about their future and **beautiful hopes** for their families ...*

*We are happy when **she** tells and draws about **what doll gift** she wants ...*

*We are excited to help them to reach their dreams of wanting to create **the world with full of love** for children....*

Take Action

YPTIA fights for the ideal development of children and their rights. We invite you to join us to have a real impact on the lives of children in Indonesia.

- Every child has the right to the best opportunity from birth to birth. Psychological support, education, fulfillment of nutrition, to the hope of broad children's future opportunities. And you can help to fulfill those needs and opportunities become reality. Your assistance and participation will help us make a broader future for the lives of children in Indonesia.
- We write and document various things about children. His dreams, hopes, desires and struggles. For those of you who are interested in children's lives, find their stories on our social media on Facebook, Instagram or Twitter and please share them with your friends. If you are interested as a writer or photographer, please join us, making a variety of major changes through your writing and photography inspiration.
- We together with you can change the world for the better. With the right spirit, insight, skills, experience, and motivation you can, and you can join to be a part of our team.
- We are fighting for broader opportunities for children through government support policies.
- Fighting for your voice or you who represent the voices of people to be heard and become part of positive social change in society. In our community where you can talk about issues that are important to you and inform decisions that affect you.

Every day our team always meet with various children's characters. We tell various things related to his world and the importance of our role for the future of the earth. We invite children to love the earth which is important for the survival of life. They are all very happy.

Do you love the world of children? Do you have the capacity and motivation to share many good things with children? Yeah, you are the person that we looking for to join our team! But if you are busy, please donate to reach the broader future of the children through our programs.
